Division Director/Assistant County Engineer

THE COUNTY OF SUSSEX
Replacement of Sussex County Bridge O-07
Passaic Avenue over Wallkill River
Ogdensburg Borough, Sussex County

Public Information Center
June 22, 2015

Public Information Center

A Public Information Center will be held on June 22, 2015 at the Ogdensburg Borough Municipal Building Council Chambers, 14 Highland Avenue, Ogdensburg, New Jersey 07439, from 6:00 – 7:00 p.m.

The purpose of the information center is to inform local residents, officials and the business community of the County's plan to award a construction contract for the Replacement of Sussex County Bridge O-07. Representatives from the County of Sussex and its design professionals will be present to explain the project and answer any questions.

Project Background

The original Passaic Avenue single span concrete encased multi-steel stringer Bridge O-07 was built over the Wallkill River in the Borough of Ogdensburg in 1928. After over 85 years of service, the fascia concrete and the beams of the superstructure have become severely deteriorated and the bridge has become structurally deficient. To address this situation, the County awarded an Engineering Services contract to Keller & Kirkpatrick, Inc. of Morris Plains, New Jersey to advance construction plans and specifications for the Replacement of Bridge O-07.

The Project

The County proposes replacing the existing structure with a new steel stringer superstructure on a steel sheeting substructure with concrete cladding. The bridge will be widened to a 28-foot width to accommodate two 11-foot lanes and two 3-foot shoulders. An open bar railing will be used with concrete pylon ends.

With concurrence from the Borough of Ogdensburg, the galvanized steel bridge railing and steel fascia stringers will be painted green, to reflect the Ogdensburg Municipal Colors. Construction will be performed under a full road closure and detour.

Funding

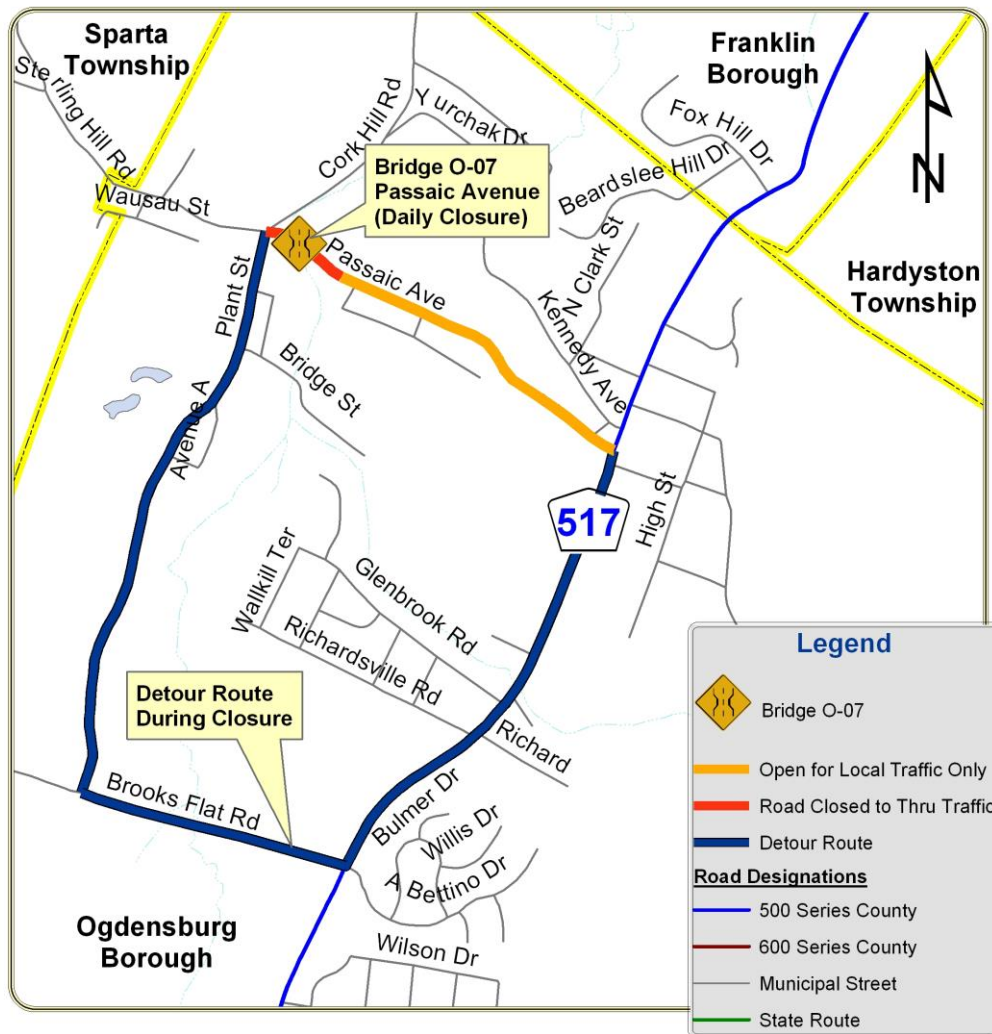

2013 NJDOT Local Bridges Future Needs Program Funding - \$1,000,000.00. Additional funds necessary to complete the project will be provided through County Capital funding.

Anticipated Construction Schedule

Advertise for Bids	November 2015
Award Contract	December 2015
Begin Construction	June 2016
Complete Construction	December 2016
